Project Objective

The aim of this project is to develop a prototype website in the form of an Online Cosmetics Store, allowing users to create their own accounts, log in and out, and browse displayed products.

The project is **not intended for real online shopping** but rather to:

- Apply theoretical concepts studied in HTML, CSS, and JavaScript practically.
 - Enhance skills in designing and developing user interfaces.
-

Functions

User Functionalities

- Create a new account (Sign Up) with data validation.
- Log in using registered account credentials.
- Log out of the system.
- Browse the Home page, which contains:

- Menu (navigation between sections).
- Image slider to display cosmetic products.
- Display of available products (*demo only, no actual purchase*).

Admin Functionalities

- Log in with Admin credentials.
- Add new products to the Home page.
- Delete existing products from the Home page.
